

Chapter 1

Don't go on the cruise

Once there was a person called Wood Tarway, who is me, who's talking here who's going on a cruise to go on vacation which I just booked to go on. A message taped to a big brick hit me firing hard on my head hard and then I thought who would want to do this to me. Then I became unconscious and I was bleeding quite a bit. The message said *don't go on that cruise or you'll die*. As I read that I didn't care so much about that but I was also a bit worried so I went on that cruise called the anti boost. As I went on to the anti boost. The cruise started to float into the air and somehow fly away but I wondered how it started to but really a good thing and I was a bit worried that I might not make it onto the cruise. I am a master at long jump. I practice so much so I was able to make it onto the cruise without falling into the water but when I was doing it I got goosebumps and then got into the control room and bust the fly controls so the ship fell onto the water and as it starts to sail away from port I got goosebumps again. I thought who would want to do this to me.

Chapter 2

Will he survive...

If you read my last chapter you will know what happened last in my book and you will know about the letter and now there are tranquilizers shooting at me and then one shot me and I fell into the water and it is a good thing that people threw the life jacket and saved me just in time. Then I became unconscious and started to float into deep sea. I didn't float onto land for a long time. and then finally...

Chapter 3

Don't drown

When I woke up. I was on sand and I guess the rope broke and then I found my old ninja suit right beside me and then I saw the impossible vampire. I didn't know it then but that vampire was the god of vampires and missiles and robots. When he created a robot and it had missiles and it shot the sand near the suit then I realised the robot was not after me it was after the ninja suit. I quickly wore the ninja suits and I found a few ninja stars in the pocket of the ninja suit so I threw the ninja stars at the robot the ninja stars hit the head of the robot and the heads

blew up in smoke and then I realised the thing that was controlling the robot was the vampire

Chapter 4

Nobody can destroy me

One million robots just appeared into the mist. They were shooting missiles at me and coming towards me and I just throw ninja stars at their heads and then their heads just blow up. Then I named myself the ninjago ninja and then that is how ninjago was born after that day I was exhausted and bombs blasted all around me and one bomb blew up under me and I did a hole flip twice. So I got unconscious. I fell onto the ground.

Chapter 5

The headquarter of ninja

In the morning when I got my awareness back I set out to find a headquarter then I found a broken ship which had everything I needed for a ninja headquarters so I got set up my new headquarters and made all the systems operational and made a

training area on the deck I made five thrusters which made the ship fly and cannon on the deck as well so if bad guys attack. I created a sensor inside the ship so I would know if a bad guy is close to my headquarters.

Chapter 6

The fight of justice

Now I am helping cops catching people like people driving cars or people breaking out of jail but I am only making them despise me more and then they make a plan to capture me so they all break out of jail good thing my sensor was working tracked them just before they got on to the ship so I wore my ninja outfit and i then I was ready to fight them and then they burst the door so then I one by one wacked them off the ship I already put a net which was underneath the ship so I put the thrusters to full power and then we arrived at the police station then I dropped them there.

Chapter 7

Finding gadgets

When I found my first weapon which was buried close to my suit which is a sword I've been digging for my next weapon and so far I have found a crystal of some kind and a sword of fire and a phone type of somonder and some more swords and lightning blaster. I found water emerald I found a nunchuk of rock

Chapter 8

Finding how the weapons work

I found out how the crystal works so it basically teleports things and the somonder somnes mechs and I added some app so it can somond my headquarters. I found how the water emerald works so it basically gets water out of it. I know how the nunchuk of rock so it basically shots rocks out of it and I figured how the weapons work when I was in battle and while I

was on the ship at while the bad guys were trying to capture me and get weapons off me I actually took weapons off the bad guys.

Chapter 9

No the headquarters is crashing

Now there are missiles shooting at my ship and then one missile hit my ship's three of my headquarters thrusters now the ship is about to crash and then I am unconscious and then when I get my awareness back I am in a crash site of my ship so then I start rebuilding my headquarters and then i am finished tuning up my headquarters at dawn. Then I was able to get the headquarters to fly again and find all the weapons before taking off into the air and then using the power of all the weapons can make the headquarters fly.

Chapter 10

New powers

Now I'm flying the ship and then the next thing I now is the powers from the weapon I found are injected into me and gave me the powers from the weapons

which means the ship is falling so i quickly injected a bit of my powers into the ship which means the ship is not falling anymore it least not for a while.

Chapter 11

Capture the bad guy

The bad guys are attacking again and then a holl army attacks the base and this time and now the ship is crashing and then the bad guys are falling off the ship.and then I figure out I still have a bit of power from the weapons and then I put more power into the weapon and then the ship was not crashing any more so I activated the nets to capture the bad guys and all the bad guys fell into the nets and then they all got knocked out so I took them to the police station so they could go to jail

Chapter 12

Going to space

So now I where the rest of my weapons are but I will need more fuel because the weapons are in space so I can go to space to get the weapons because I have to find one more weapon to go to space so I have been

digging since I found out so could find the last of the weapons and now I have found the weapon I need to add it to the headquarter so I can go to space so I somond the ship so I added the weapons to the place where the other weapons were and I activated full power at the thrusters so I blast of into space

Chapter 13

Getting away from robot destroyers from space

Once I am in space there are a lot of robots and they are all shooting missiles but then the missiles opened and then vampires came out of it and tried to destroy my ship but I survived the destruction of my ship so I was stranded for days but then I saw my weapons that powered the ship so I figured out that at that place the big fight had happened so I started rebuilding the headquarters so I could continue searching for the weapons so I build the ship as quick as I could and I was just finished the headquarter just before I ran out of air from my oxygen tank so I quickly went to the area where the more tanks were so I quickly ran and filled the tank and now I knew I still wasn't safe because they would come back to

fight me so but they had already come back so I quickly put all the power in the thrusters and the ship blast into space away from the robot destroyers.

Chapter 14

Finding weapons

Now that I am away from the robot destroyers so now I can continue finding the weapons so I can get more power into the ship so I went into space and cool I found a weapon but I do not know what it did so I continued looking for weapons and now it is a good thing that I found another out of four so two out of four so I put them to power the ship and when I blast the ship into space and it was so fast that I fell down on the ship and you don't know how it hurt so much that I got unconscious so I did not hear the bad guy alarm so when I got my awareness back so I realised that I nearly got captured by vampires so I quickly smacked some vampire off the ship and then I figured out that they had the weapons so I quickly got the weapons off them and smacked them off too so I had all four weapons

Chapter 15

Going back to earth

If I wanted to return to earth but I need one more weapon if I want to survive the atmosphere because of the heat and pressure would destroy my ship if I do not have another weapon and I would just start to fall and then the ship would disintegrate in the heat so I am searching for one more weapon and look what I found but I don't know what it does and then the next thing I know is that I am having a vision about how the weapon works so then I figure out that the weapon is a shield so I activate it around the ship and then I activate full throttle to the thrusters so the was flying in the clouds again and then I saw lots of vampires taking over the world.

Chapter 15

Fight against the vampires

Now I just get new powers and then I get a vision how to use these new powers and a fighting mode which I know how to activate and these vampire I see are more weird type of vampire than usual because I tried all the types of attacks but it does no effect on them and they also have new power it's like they got new powers too except the battle mode so I use all the ship's fire power to blast them but most of them but the vampire still survived so then I realised the only way to defeat the vampire is to combined all the new powers I got so I combine all the powers and I unlocked super mega fighting mode and I got this cool saber which I used to slash all the vampire at once and then they all got destroyed. I launched the ship back into the air. I was back in business to stop the bad guys so I also could go to space just in case to defend space.
